SL4M Thermal Barcode Printer End-of-Sale

Printronix Auto ID has announced the end-of-sale of the SL4M Thermal Barcode Printer line as of October 31st, 2016. Existing inventory of SL4M printers will continue to be sold through the end of the year, based upon availability. Printronix Auto ID will continue to offer full support of the T4M in terms of technical support, spare parts and consumables availability through October 31st, 2021.

The SL4M has been replaced by the new state-of-the-art T6000 Thermal Printer Series with the 4 inch Short-Pitch RFID option. The Short-Pitch technology allows the T6000 to print on RFID tags as small as .625 inches. This capability lowers costs, improves RFID productivity, and provides faster ROI.

In addition, the T6000 has set a new industry benchmark for mid-range production in terms of speed, versatility, and reliability:

1. **True speed**, productivity, & print quality that allows the T6000 to print at the highest speeds available in the market with readable print quality
2. **Versatile** “plug & play” simplicity in any 4” or 6” rugged environment with the most extensive number of printer languages in the industry, as well as the optional 4” On-Pitch RFID
3. **Reliable** production through the industry’s leading intelligent barcode printing system that prints, validates, and grades all in one step

The following is a partial list of the most common T6000 RFID part numbers, and the equivalent version to replace the existing SL4M Thermal Printer:

T6000 Part Number	T6000 Description	SL4M Replacement Part Number
T62R4-1100-01	T6204 4" 203DPI RFID	SL4M2-0100-00
T63R4-1100-01	T6304 4" 300DPI RFID	SL4M3-0100-00
